Published Monthly at 470 Fourth Avenue, New York, by Buttenheim-Dix Publishing Corporation. Branch Offices: Daily News Building, Chicago, Tom Dix, President; 642 Hanna Building, Cleveland, George Conover, Manager. Price 25 cents; \$1 a year. Entered as second-class matter April 1, 1923, at the post office at New York, N. Y., under Act of March 3, 1879.

Printed in U. S. A.

### Important for 1933—

**¶** *Fight gas tax diversion. Highway construction is being hammered from every side. Federal Aid is being cut. Highway bonds and income are being used for doles. Highway construction is a fundamental industry in America's continued life and growth. Transportation by automobile and truck would be impossible on the roads of 1905. Road construction gives much needed employment, both direct and indirect. Fight FOR highway construction and AGAINST gas tax diversion.*

**¶** *Don't bid at or below your costs on any job. You must make a profit to live.*

**¶** *Remember your machines depreciate whether you use them or not. Watch new equipment and be prepared for CONSTRUCTION IN 1933.*

# They're Moving Dirt for 4.95¢ per Cu. Yd. »   »   »   »   »   »   »   in Missouri

The song of the DIRTMOVER is cheap dirt—lower and lower cost per yard.

Martin Wunderlich Construction Company, Jefferson City, Mo., were up to their ears in tough red clay and Missouri gumbo—a road grading job—and used their Blaw-Knox (Ateco) Hydraulic DIRTMOVER to do the work at 4.95¢ per cubic yard.

Construction equipment, powered by Continental, always gives satisfactory, dependable and economical service. Performance and low operating costs are assured by the records of 3,500,000 Continental engines produced in the past 30 years.

Continental's laboratory engineering facilities and data are at your disposal. We invite you to write.

Visitors to the Highway and Building Show at Detroit, Jan. 16 to 20, are invited to visit our plant.

# SPEED DEMONS that will cut your costs

## MULTIPLE - ROPE

The Williams multiple-rope bucket has a double hinge which permits a wider spread of the open bucket and a more rigid construction. Six-part reeving gives straightest lead of closing cable.

*Write for bulletin.*

## DRAGLINE

The lightness and perfect balance of the Williams dragline bucket permit freer handling and a maximum of payloads. All points of stress and wear are of special design and strongly reinforced.

*Write for bulletin.*

## THE WELLMAN ENGINEERING CO.

7012 Central Ave., Cleveland, Ohio

Birmingham Chicago New York Detroit Pittsburgh Mexico City

## POWER - ARM

The Williams power-arm bucket has the Williams exclusive power-arm combination of lever and block-and-tackle which reduces handling time by developing greater digging power with less cable over haul.

*Write for bulletin.*

# for Lower Dirt Moving Costs—

## The Blaw-Knox Low Cost DIRTMOVER--

The song of the Blaw-Knox (Atco) Hydraulic DIRTMOVER is cheap dirt, lower and lower cost per yard.

Yardage costs such as \$.0495 per cubic yard, and lower, dependent upon length of haul—are a matter of common record. We would like to tell you about contractors who are making real money out of all kinds of dirt moving jobs.

Ask about the low cost DIRTMOVER.

## The Blaw-Knox Hydraulic BULLDOZER--

—moves more dirt at less cost.

The rigid box type construction conserves tractor power by an amazing reduction in Bulldozer weight without sacrifice of strength. Easy and quick to put on—two way control, with positive downward pressure on the curved digging bowl—speedy bulldozing.

The hydraulic power which operates the digging bowl is concealed in the sidearm—away from dust and dirt.

Send for Bulletin No. 1394.

## GIANTGRIPT HAND FLOATS and BULL FLOATS

Designed and dimensioned to meet state specifications everywhere, GiantgripT Floats are accurately cut from seasoned knot-free cypress and are fitted with dadoed cross cleats and lengthwise stiffeners to maintain their straightness on the job.

The Bullfloat (Longitudinal Float) is available in 12 and 16-foot lengths and in varying widths to suit state requirements. Fitted with oak plowhandles adjustable to suit operator's height, and steel-braced.

The Handfloat is available in lengths from 3 to 10 feet and in widths to suit state specifications. Fitted with steel handle bracket which permits use with standard GiantgripT Straightedge Handle of steel tube. The drop-forged connector, an integral part of every GiantgripT Handle makes a tight and wiggle-proof connection between float and handle.

*Send for new 1933 catalog "C" which describes the GiantgripT Line of paving hand tools.*

# TEEGRID Bridge Floors

(PATENT APPLIED FOR)

Rapid erection—greater rigidity—no forms required—steel armored wearing surface—cross bars pressure welded to tees with no reduction in area—triangular bars hold concrete positively in place—girders, stringers and Teegrid slab become a homogeneous steel diaphragm to resist distortion stresses.

*Write for the Teegrid Handbook.*

Its Weight  
in Dirt**

NOW you can own a tractor-operated scraper that is a real excavator. It is built along the same lines as the famous cable-operated Sauerman Crescent Scrapers used by thousands of contractors. It has the power and strength to tackle the toughest digging, coupled with the ease of handling and the large carrying capacity that brings about dirt moving costs of a few cents per yard.

Write for prices and details on scraper to meet your needs, stating size of your tractor.
